## Repaso del capítulo (PDF)

- Puzzles
  - Crossword
  - Jumble
  - Word Search
  - Word Search with Clues

## Internet Link Activity

Test preparation

**Web codes:** In the textbook next to a lot of the notes and activities they list a web code if you want to view them on-line and have more practice with that specific topic. Many of reviews are the same as above, but there are others. If you are struggling with a section we do in-class look at your textbook and write the web code in your planner so you look at on-line later.

5. Choose the option(s) that will help you the most.

**Practice activities** cover the different vocabulary and grammar activities that meet the objectives of each unit.

**Audio Files** can help you practice pronunciation, allow you to watch the Videohistorias to review your comprehension, and even have you listen to scripts to review for the test.

**Repaso de capítulo** pdf gives you all the vocabulary for the chapter and the main grammar points. It also gives you the same test review page that is at the end of each chapter in the textbook.

**Puzzles** are games/activities to have more practice with the objectives of the chapter.

**Test Preparation** is a great way to prepare for the tests
